UPDATE REPORT
2023

Project update on funds raised at the 2022 Presidential Golf Challenge

Cyril Ramaphosa Foundation was nominated as the beneficiary of the 2022 Presidential Golf Challenge. The funds raised were for the construction of ablution facilities in support of the Department of Basic Education's Sanitation Appropriate for Education (SAFE) Initiative. The Foundation appointed its partner entity, Adopt-a-School Foundation to implement sanitation projects, through its community-based infrastructure model, at **Lower Ndakana Primary School** in Nqamakwe, Eastern Cape and **Mbokota Primary School** in Mbokota village in Limpopo.

The schools were identified in partnership with the Department of Basic Education and the projects at both schools commenced in August 2022. Construction commenced after the drawings were approved in November 2022 and it is currently underway.

At Lower Ndakana, a Ventilated Improved Pit (VIP) ablution facility is being constructed, while a flushing system is being constructed at Mbokota Primary School.

Through the implementation of Adopt-a-School Foundation's Community-based Infrastructure Model, 14 job opportunities on site have been created at Mbokota Primary School, and 18 at Lower Ndakana Primary School.

About Cyril Ramaphosa Foundation

Cyril Ramaphosa Foundation is an independent Public Benefit Organisation that was established in 2004. The Foundation advances programmes that target socioeconomic challenges in education, small business development, youth development, social cohesion and nation building, as well as those affecting women and children. It implements its programmes through its partner entities: Adopt-a-School Foundation, Thari Programme, KST, Cyril Ramaphosa Education Trust (CRET), and Black Umbrellas.

Aligned with the Sustainable Development Goals of the United Nations, the Foundation drives progress in its focus areas through partnerships, toward an inclusive and empowered society. Cyril Ramaphosa Foundation is a partner of choice for dynamic development models that make a real difference to lives.

About the Adopt-a-School Foundation

The Adopt-a-School Foundation (AAS), officially established in 2002, strives to support the delivery of enhanced and conducive teaching environments. This is done with the support of public and private partners that assist the Foundation in implementing its replicable model of Whole School Development (WSD). The model focuses on developing four critical areas within a school environment: leadership, curriculum, infrastructure and social and learner well-being in adopted schools.

The Foundation believes in the power of partnerships and collaboration in building a dynamic, transformed, and accessible schooling environment that produces capable global citizens to meet the developmental needs of Southern Africa. The Foundation works with a range of public and private partners such as corporates, individuals, best practice NGOs and the Department of Basic Education to grow the footprint of Whole School Development. In 2022, the Foundation celebrated 20 years of implementing the Whole School Development model in schools across Southern Africa.

Adopt-a-School's Impact

640+

Adopted schools

1 555 240

Adopt-a-School's Community-based Infrastructure Model

Adopt-a-School Foundation is driven to uplift not only the schools, but the communities in which those schools are located. Skilled and unskilled parents from the community are supported through temporary employment opportunities in the construction of the facilities. This helps to improve the sustainability of school development and the success of implemented projects. The personnel are sourced with the help of a Project Steering Committee (PSC), comprised of volunteers from the School Governing Body and School Management Team, in partnership with the Foundation's Project Manager. The infrastructure model provides temporary employment for the workers and empowers them with a set of skills and experience that improves their employability. Through the 2022 Presidential Golf Challenge projects, the Foundation afforded temporary employment opportunity to many parents within the community.

Sanitation and SAFE: the Construction of Ablution Facilities

The construction of ablution facilities is critical in schools that have pit toilets, dilapidated and vandalised toilets, or an insufficient number of ablution facilities for the size of the school. As per the Department of Basic Education's Sanitation Appropriate for Education (SAFE) Initiative, over 10 000 new ablutions facilities are needed across the country to eradicate pit toilets. The ideal ratio of toilet to learner is a minimum of 1:25 and a maximum 1:30 in line with the Department of Basic Education's (DBE) Norms and Standards. Many of our schools have over 50 learners sharing a single toilet which is more than the recommended norms for public school infrastructure.

Ablution facilities are necessary spaces to provide adequate health and hygiene, both in the short and long-term, as well as to ensure the dignity of learners. This need was further exacerbated by the COVID-19 pandemic. Adopt-a-School Foundation has over 20 years' experience in delivering projects in all areas, including in schools located in rural communities that do not have access to running water or are not connected to a municipal sewerage line. The Foundation further takes into consideration the Government Gazette for the Minimum Uniform Norms and Standards for Public School Infrastructure to ensure alignment with the Department of Basic Education.

Presidential Golf Challenge Impact 2018 - 2022

Cyril Ramaphosa Foundation is immensely thankful to have been a beneficiary of the Presidential Golf Challenge since 2018. Through the over R13 million raised at the Presidential Golf Challenges, schools around the country have benefited from safe, functional and sustainable ablution facilities, classrooms and a feeding scheme kitchen.

Impact Numbers

2018 Presidential Golf Challenge

3

classrooms built in Limpopo

1

feeding scheme kitchen built in Gauteng

1 416

learners who benefited from these projects

76

temporary employment opportunities created

12

small and medium-sized enterprises that have benefited

Schools that benefited: Ditsepu Secondary School in Limpopo and Motshegofadiwa Primary School in Gauteng.

2019 Presidential Golf Challenge

5

ablution facilities built in KwaZulu-Natal, Limpopo and Eastern Cape
